# Hawai`i Health Performance In Action

---

*An Update of the Hawai`i Health Performance Plan (H2P2)*

---

Spring, April 2001

Volume3 Number 1

---

## SHPDA is...

---

A Partnership of Hawai`i's health care industry and communities statewide planning for Hawai`i's health care future. Our focus is facilities and services development that achieves *access to quality* health care a *reasonable cost* for our citizens.

This focus is guided by our philosophy...

*"Supported by their community, individuals achieve optimum health."*

We focus on critical elements of a well functioning health care delivery system including:

- ✱ Access to Care
- ✱ Continuity of Care
- ✱ Constituent Participation
- ✱ Health Resources Management
- ✱ Cost Containment
- ✱ Quality Health Management Practices

These elements keep health care delivery responsive to community needs and health care industry standards. 🇺🇸

---

## Hawai`i Health Performance Plan (H2P2)...

---

Developed by a partnership of Hawai`i's health care industry and communities statewide, this is the state's statutorily mandated health services

and facilities plan. H2P2 is the foundation of all SHPDA activities. Its focus is on the bottom line of health care - health care outcomes.

## H2P2 Implementation...

- Integrated into private sector strategic plans.
- Helping small business on the Big Island – the Hawaii County Subarea Health Planning Council (Council) partnered with the Chamber of Commerce to establish much needed and affordable employee assistance programs for small businesses on the island. In this way, substance abuse services became accessible to over 100 employees.
- Educating seniors about prescription drugs – the Honolulu Council designed and partnered with a major bank to distribute prescription drug information to over 75,000 seniors.
- Bringing together community resources to help children with asthma – our Windward Council formed the first ever Asthma Coalition. The Coalition established pilot projects at four public schools, developed an Asthma Resource Book and has applied for asthma grants.
- Established dental task forces and alliances – the Kauai and Maui Councils are helping their communities more effectively deal with the epidemic of dental caries. 🇺🇸

## State Health Planning and Development Agency (SHPDA)

*Governor:* Benjamin J. Cayetano

*Administrator:* Marilyn A. Matsunaga

### STATE HEALTH COORDINATING COUNCIL:

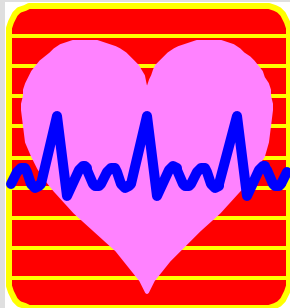

Randy Perreira, Chair  
Winifred Odo, Chair, Review Panel  
Jim Walsh, Chair, Plan Development Committee

### SUBAREA HEALTH PLANNING COUNCILS:

Ken Villabrille, Chair - Kauaʻi County  
Lane Uchimura, Chair - Honolulu  
Laurie Oishi, Chair - West Oʻahu  
Annette Ostrem, Chair-Windward Oʻahu  
John Ornellas, Chair - Maui County  
Beverly Jean Withington-Hawaiʻi County

### STAFF:

Shirley Kidani, Planner  
Nikki Miyamoto, Planner  
Clarysse Kami Nunokawa, Planner  
Ken Yoshida, Research Statistician  
Amy Ichiyama, Secretary  
Kellie Sanchez, Clerk Typist

## Certificate of Need – A Planning Tool...

Health care is a “hybrid” public utility and as such is regulated by the state to insure that access to care is upheld, quality is ensured and reasonable costs are maintained. The Certificate program values community input in all decisions rendered. All community input is based on review of data and guided by criteria set in law. Over 100 Hawaiʻi citizens are members of SHPDA’s review councils.

To better serve our customers we’ve streamlined the certificate of need process.

- We’ve worked with our customers to modernize the review process and application forms.
- “Common sense” items are exempted from review. Examples are construction projects to meet fire/safety/licensure codes, non-patient care areas such as parking garages, replacement of existing equipment with its “modern day” equivalent, primary care clinics within certain parameters.
- Increased the review process – as quick as three weeks. 90% of applications are reviewed in less than two months. 🇺🇸

***...to promote accessibility for all the people of the State of Hawaiʻi to quality health care services at reasonable cost.”***

Hawaiʻi Revised Statutes, Chapter 323D-1

## Our Volunteers...

**S**HPDA has at its core, local level and statewide councils. Throughout our thirty-plus years, we have maintained a focus on grassroots, community health care planning and development activities.

**Statewide Health Coordinating Council (SHCC)** is composed of a solid cross section of Hawai'i's people. The Council reviews certificate of need applications and hosts an impressive series of meetings focusing on the pressing health issues facing Hawai'i.

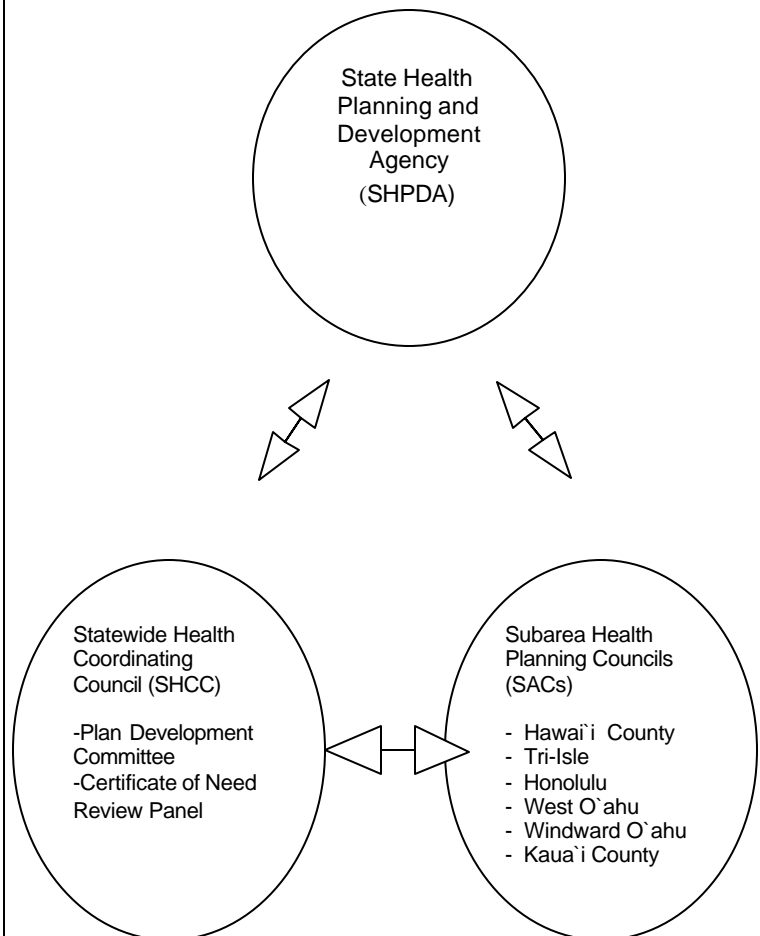

**Subarea Health Planning Councils (SACs)** are “grassroots” health planning at its best. These Councils developed and implement H2P2 in their communities. They are the:

- Hawai'i County SAC
- Tri-Isle SAC
- West O`ahu SAC
- Windward O`ahu SAC
- Honolulu SAC
- Kaua'i County SAC

**Plan Development Committee (PDC)** is a standing committee of the SHCC and a prime example of private-public partnership. This “workhorse” of a Committee researched, developed and wrote H2P2 together with the SACs and other community partners.

**Certificate of Need Review Panel** is another standing committee of the SHCC. This Panel focuses on technical review of certificate applications. 🌺

## Organization Chart...

## FOCUS ON...Organ Donor Center of Hawai'i

*Share your life and be an organ and tissue donor...*

- One donor can help 25 people.
- Age and medical history should not prevent you from considering organ and tissue donation
- All of the world's major religions support donation
- Most transplants in Hawai'i depend on a donation from the local population
- Everything medically possible is done to save the patient's life before the option of donation is considered.
- There is no cost for donation. 

*Share your decision...*

If you've decided to be an organ and tissue donor, you must tell your family so that your wishes can be carried out. Complete the family information card and give it to your family so that they will know of your decision.
